

## Continuous Duty, Type II, Unsealed Intermittent Duty, Type III, Unsealed

### General Specifications:

- Designed to MIL-R-6106
  - Type II Unsealed Continuous Duty
  - Type III Unsealed Intermittent Duty
  - Covered/Gasketed Contact Area
  - Twin-break Silver Alloy Contacts
- Meets Explosion, Humidity, Salt, Spray, Sand and Dust requirements.
- Altitude: 50,000 feet
- Shock: 25 g's ½ Sine 6 to 9 milliseconds
  - Maximum contact opening: 2 milliseconds
- Acceleration: 10 g's
- Vibration Limits:
  - 5 to 10 Hz: 0.8 in DA
  - 10 to 55 Hz: 0.6 in DA
  - 55 to 2000 Hz: 2 g's
- Temperature Range: -55°C to 71°C
- Insulation Resistance:
  - 100 megohm minimum initially
  - 50 megohm minimum after tests
- Dielectric:
  - 1250 Vac minimum initially
  - 1000 Vac minimum after tests
- Life:
  - Electrical Operations: 50,000 cycles
  - Mechanical Operations at 25% of rated resistive load: 100,000 cycles
- Minimum Current: 10% of rated Dc resistive load
- Intermittent Duty Ratings:
  - % of rated resistive
  - Time on in minutes
  - Cooling time is required between successive overload applications

1/ Coil will exceed 95°C temperature rise when left on continuously in 25° ambient, but will not be damaged. At maximum ambient temperature of 71°C, the duty cycle should be limited to 15 minutes "on" time per half hour to obtain maximum coil life.

2/ Continuous and intermittent duty ratings shown are for N.O. pole. N.C. pole rated at ½ the listed continuous DC duty ratings. N.C. pole on 6041H53 and H220 limited to 15 g's shock.

3/ Time on 1 ½ minutes at 29 Vdc. Minimum time off is 3 minutes.

4/ All continuous duty resistive and motor load ratings and all intermittent duty ratings for all 3 pole relays listed under 28 Vdc apply for 120 Vdc systems with all 3 poles of the relay connected in the series.

5/ Pick-up voltage below values shown may cause relay to rapidly cycle on and off (chatter).

6/ Relay must drop-out at voltage value or less and may drop-out at any voltage below the higher voltage noted.
